

5 RESOLUTIONS

FOR PETS TO START 2021 ON THE RIGHT PAW

1 Make a date with your vet

Did you know? Dogs and cats instinctively hide symptoms of illness that could present as weakness to predators in the wild.

Even if your pet seems healthy, wellness exams and routine bloodwork can help prevent illnesses and catch problems early, when treatment can help the most.

2 Help your pet get in shape

Did you know? An estimated 60% of cats and 56% of dogs are overweight or obese.*

Overweight pets are more likely to develop diabetes, arthritis, and heart disease.

3 Make fitness fun

Did you know? Regular exercise can slow aging, boost the immune system, and help eliminate unwanted behaviors.

Explore new trails. Create an obstacle course. Play hide and seek. Have fun with lasers. Teach new tricks. Consider a pet treadmill!

4 Brush up on dental care

Did you know? Periodontal disease is the most common disease in dogs and cats.

Bacteria can enter the bloodstream and damage the kidneys, liver and heart. Pets with good oral health live longer!

5 Microchip

Did you know? A pet is lost every 7 seconds, and only 10% of pets return home without an ID.

Help your pet make it home by microchipping, registering, and keeping your contact information up to date.
