Spring Pet SAFETY TIPS

Household Cleaning Products
Always read labels for pet safety warnings and keep cleaners out of paws' reach.

Seasonal Pests
Make sure your pet is up to date on flea, tick and heartworm prevention.

Springtime Blooms
Tulips, lilies, daffodils, and azaleas can be particularly dangerous to pets.

Lawn and Garden Hazards
Fertilizers, pesticides and herbicides are toxic if ingested. Cocoa mulch is also dangerous because it contains theobromine, the same compound found in chocolate.

Microchip
More time outdoors = more chances to escape. Once your pet is microchipped, make sure your contact information is up to date.

Hairball Prevention
Spring is shedding season for many pets. Ask us about the best remedies you can use at home.

Screen Safety
Ensure all screens are snug and sturdy to prevent any falls.

Unfriendly Fungi
Wild mushrooms can be a very dangerous dinner for your pets.

Spring is a great time for an annual checkup. Hop in to see us!
